SOLIS ENGINEERING & PROJECT SERVICES

Built for what cannot be left to chance.

SOLIS Engineering & Project Services supports complex industrial, construction, maritime and oil and gas projects with specialised rigging, engineering support, safety risk consulting, project management and skilled workforce solutions.

We help our clients bring structure to demanding environments through practical experience, disciplined planning and a clear commitment to the safety, quality and delivery their work depends on.

Introduction

SOLIS Engineering & Project Services is a Durban-based industrial services company supporting clients across some of South Africa's most demanding project environments.

Our work spans rigging, lifting, project planning, safety risk consulting, mechanical and engineering support, marine and ship repair, civil infrastructure, construction and oil and gas.

We do the work that has to be done properly, the first time.

90+

years of combined
operational
experience

MANIFESTO

Some work cannot be left to chance.

*When the site is complex.
When the lift is critical.
When the timeline is tight.
When the safety requirements are non-negotiable.*

Clients need more than labour. They need control.

*They need people who understand pressure, risk,
coordination and execution. People who have done the work
before, on sites where there is no margin for getting it wrong.*

That is where SOLIS works best.

*We bring skilled crews, practical experience and disciplined
support to the environments where safety, timing and
reliability matter most.*

Critical Works. Controlled Delivery.

WHAT WE DO

Specialised support for critical industrial works.

SOLIS delivers practical, site-ready support across four core disciplines, designed to help clients manage complexity, reduce risk and deliver demanding work with confidence.

OUR FOUR CORE CAPABILITIES

01.

Specialised Rigging & Lifting

Controlled support for complex lifts and demanding site environments.

02.

Safety Risk & HSE Consulting

Strengthening compliance, readiness and project safety from tender to handover.

03.

Project Management & Planning

Experienced planning and coordination personnel for time-sensitive industrial delivery.

04.

Engineering & Fabrication Support

Skilled technical people for mechanical, fabrication and quality control environments.

SECTORS WE SERVE:

Construction & Infrastructure • Maritime & Ship Repair • Oil & Gas • Industrial & Mechanical • Safety & Compliance-Driven Projects

01. Specialised Rigging & Lifting

**Precision under pressure.
Control where it counts.**

SOLIS provides general and specialised rigging services for industrial, marine, construction and project-based environments. Rigging is not simply about lifting. It is about planning, precision, sequencing and control, applied by people who understand what is at stake on the ground.

General rigging

Specialised, complex and high-risk rigging operations

Disassembly and reassembly of crane structures

Removal and installation of crane wires

Marine and industrial rigging support

Site-based lifting and operational support

What this means for clients:

Lifts that have been planned before they are executed, with crews that know how to respond when conditions on site demand it.

02. Safety Risk & HSE Consulting

From uncertainty to readiness.

SOLIS supports businesses with practical safety risk consulting and HSE readiness, for tender submissions, project execution and ongoing operational requirements. We help clients close the gap between what regulation requires and what the site actually demands.

Compliance support aligned to legislation and client specifications

Documentation readiness for tender and contract

Review and drafting of HSE documents for tender purposes

Evaluation of training needs for business and project scope

Project execution and employee evaluation support

Medical surveillance and control guidance

Regulatory, industry code and client requirement support

Risk management support

Ad hoc HSE services

What this means for clients:

Documentation, safety thinking and operational discipline that meet legislative requirements and client expectations and stand up under audit.

03 Project Management & Planning

Coordination, communication, control.

SOLIS provides experienced project support personnel to help clients plan, coordinate and deliver demanding project environments. Successful delivery depends on more than manpower. It requires planning discipline and the ability to respond when project conditions shift.

Project Managers
Lead Planners
Planners
Junior Planners
Schedulers
Project execution support

What this means for clients:

A planning and coordination layer that brings structure to complex programmes, with people who keep the work moving when timelines tighten.

04 Engineering & Fabrication Support

Skilled people for industrial work.

SOLIS supplies experienced engineering, mechanical and fabrication personnel for operational and project-based environments. Our people understand the demands of industrial work and the importance of safe, reliable execution.

Quality Control Inspectors & QC Managers
Pipe Fitters, Piping Foremen, Piping Supervisors
Mechanical Fitters, Mechanical Foremen, Mechanical Supervisors
Welders, Welding Foremen, Welding Supervisors
Boilermakers, Boilermaker Foremen, Boilermaker Supervisors

What this means for clients:

Trade competence and supervisory depth, deployed at the level the project requires, from individual placement to full-scope crews.

Built for demanding environments.

SOLIS supports clients across sectors where reliability, safety and technical competence are not negotiable.

Construction & Infrastructure

Rigging, engineering support, site teams, project planning and operational workforce solutions for major civil and construction works.

Maritime & Ship Repair

Marine rigging, ship repair support, technical personnel and safety-focused project delivery, with port-proximate operations out of Durban.

Oil & Gas

Specialised project support for high-risk, high-compliance industrial environments where execution standards leave no room for shortcuts.

Industrial & Mechanical

Engineering, fabrication, mechanical, quality control and technical workforce support across operational and project-based sites.

Safety & Compliance-Driven Projects

HSE readiness, tender documentation, risk management and project safety support, for clients operating under regulatory scrutiny.

Why SOLIS

Technical capability / We understand the realities of rigging, engineering, fabrication, HSE and project-based work, because we have done it.

Safety discipline / Critical environments leave no room for shortcuts. Safety is built in, not bolted on.

Experienced leadership / 90+ years of combined management experience across rigging, ship repair, marine, civil infrastructure and oil and gas.

Reliable execution / We deliver work that is planned properly, supervised properly and finished properly.

Our Promise

Safety first. Always. On every site, on every shift.

Skilled people. Trained, screened, supervised and fit for the work.

Clear communication. From scoping to sign-off.

Honest delivery. The work as agreed, at the rate quoted, on the timeline given.
